The villa is built of the highest quality materials, so it is covered with travertine stone on the outside. The main advantages of this type of stone are: good ability to retain heat during the winter, perfect cooling during the summer, excellent sound absorption, durability and long service life. It is also environmentally friendly, because no chemicals are used in its production. Another positive feature of this material is that with age and the presence of sunlight, the surface does not fade, but retains its original shine.

The living space of the villa is spread over three floors.

The ground floor is dominated by a spacious living room with grand indoor fireplace, kitchen and dining room in an open concept with access to the terrace, sunbathing area and swimming pool. The ground floor also contains a gym, a wellness area with a sauna, a hydromassage tub and a bathroom, as well as a guest toilet and a technical room.

On the first floor, there are hallway, four bedrooms with private bathrooms that offer a fantastic view of the sea.

On the second floor there is a studio apartment and a spacious terrace with a wonderful view of the sea and the marina.
